南－北走向的斷層
N-S trending fault

海浪侵蝕在斷層
最脆弱的部分發生
Wave erosion at the weakest point of the fault

形成洞穴
Cave formation

洞穴貫穿岬角，
形成海蝕拱
Sea arch was formed when the cave penetrated
the headland

狀如頭部被砍掉的海蝕柱
Stack appears as a chopped head

貢頸洲的海蝕拱因缺乏
支撐而坍塌
Cham Keng Chau arch, which
collapsed due to lack of support
