節理  
Joints

海浪直接切過節理  
Waves cut directly at the joints

層理  
Beddings

海浪切割而成的海蝕凹  
Notches formed by wave-cutting

沉積岩塊坍塌，  
Continued widening of the middle section  
by collapse of the sedimentary block

使中間部分繼續擴闊

海浪和風力侵蝕  
Stacks lowered by wave and wind erosion

使海蝕柱愈來愈低矮

兩個獨特的岩塊  
Two extraordinary blocks stand like  
watchtowers, called “Kang Lau” in Chinese
